A BETTER LANTERN ROOF

The purpose designed Cirrus aluminium lantern roof system is discreet yet stylish.

Cirrus allows light to flood into your home's interior, the ideal modern lantern solution, coupling sleek contemporary looks with truly outstanding thermal performance.

Designed from the ground up around an innovative thermally broken system, it provides excellent thermal performance - keeping cool in the summer and warm in the winter - while delivering the architectural refinement you'd expect of a high end aluminium lantern roof system.

Whether you are building a new kitchen-diner extension or replacing an existing lantern roof, Cirrus will help redefine your home, creating light and airy spaces for you to enjoy.

CIRRUS LANTERN ROOF STYLE SQ

CIRRUS LANTERN ROOF **STYLE A**

DESIGN AND COLOUR OPTIONS

Available in 2-way, 3-way, square or contemporary designs, with sizes up to 3m x 6m, this high end, high performance lantern roof is ideal for modern living. Cirrus helps you create fresh, bright interiors - expanding your rooms and bathing your home in light.

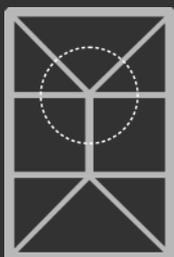

Choice - Cirrus comes in a choice of two hard-wearing exterior powder coated finishes, with the option of a white or grey interior finish. And for the ultimate in design

freedom, Cirrus lantern roofs are available in any RAL colour, internally or externally.

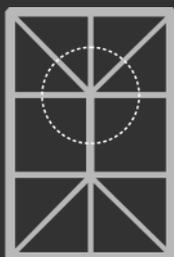

MINIMALIST CONTEMPORARY DESIGN

For the ultimate in minimalism, the innovative contemporary style supports the ridge solely by the hip rafters, for an ultra slim, clean and modern look.

Contemporary

Max dimensions
1500mm x 3000mm

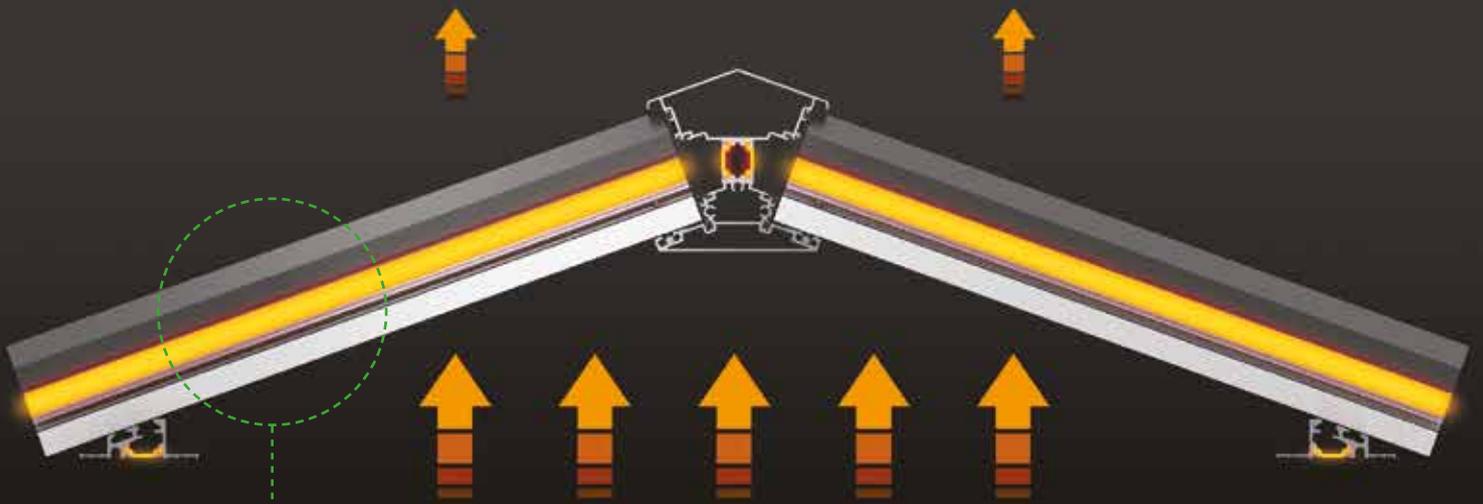

A woman wearing a white long-sleeved top, black pants, and a black hat is sitting in a wooden armchair with a striped cushion. She is positioned in a bright, minimalist room with white walls and a large skylight in the ceiling. The skylight has a geometric, multi-paneled design. In the center of the room, there is a round wooden coffee table, a large potted plant, and another wooden armchair with a striped cushion. Two tall, black floor lamps with white lantern-style shades are positioned on either side of the seating area. A white radiator is visible on the left wall. The floor is made of light-colored, textured stone tiles.

“ We now have a multifunctional room we can use all year round for cooking, entertaining and relaxing. Our two Cirrus lantern roofs have made a huge difference to the space.

WARM IN WINTER - COOL IN SUMMER

Thermal break technology ensures that Cirrus is warm in the winter and cool in the summer. Every element of the lantern has an ultra-low conductive element that separates the inner and outer aluminium skin, helping keep heat transfer down, and your heating bills low.

533x

Polyamide nylon, glass composite thermal breaks are 533 times more thermally efficient than aluminium!

SIMPLY BUILT BETTER

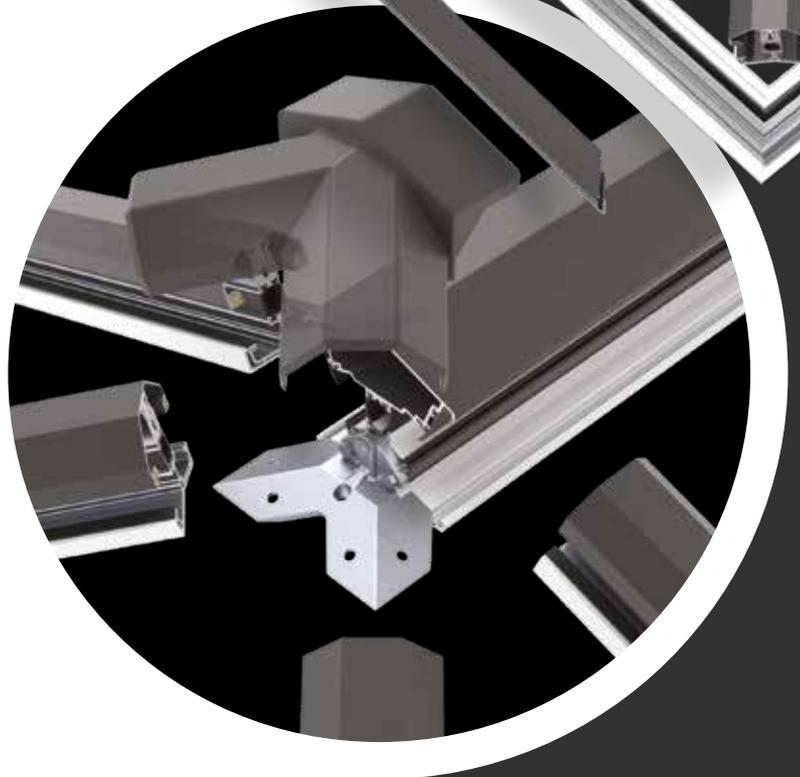

Every element of the Cirrus Thermal Lantern Roof has been designed to be exceptional. From the low profile 20° pitch that allows us to use purpose designed cappings that keep sightlines to a minimum - and your view of the sky maximised - to the discreet black finish of our perimeter beam. This attention to detail ensures that even if you view the lantern from above all you'll see is glass and a discreet shadow line.

Cirrus is high-quality British engineering at its best.
