

Horrods

70 years of engineering excellence

Hot Air Rubber Materials Melters

- The standard machines are thermostatically controlled and are gas-fired. With the exception of the 3-Phase **Fully** electric model, which does not require propane as heating source.
- Horrods design and manufacture our products to be efficient, safe and provide longevity. Which is why we provide operator training and servicing of burners & 110 Volt electric drives.
- Manual Agitation ½ & 1 Drum Gas-fired Hand-Stirred melters
- 110-Volt Electric Agitation 1-4 Drum 110 Volt Electric Drive - Gas-fired melters.
- 1½ Drum 3-Phase Fully electric models
